The Mining District Basketball Tournament

Large Floor Space of School of Mines New Gymnasium Proves Ideal for Contests—Over Two Thousand Are Seated Comfortably at One Time.

"The greatest single event ever held on the Mines' campus," is the way students, faculty, and alumni characterize the Mining District Basketball Tournament held in the Mines' gymnasium on February 19, 20, and 21. The tournament brought out on the Hill eleven high school quintets to compete for the honor of representing the district at the state tournament held at Bozeman early in March. In addition it brought the principals of the schools, many of their faculty members, many of their students, and hundreds of Butte and Anaconda people who otherwise would have had no purpose in visiting the School of Mines. They were certainly three big days for the Ore Diggers, even though the tournament was not primarily a School of Mines event.

The Mining District competition this year was held under the direction of Butte Central high school. The members of their athletic board very early recognized that the new Mines gymnasium was by far the best place in Butte to hold their event. They made arrangements for the use of the big floor, arrangements into which the School of Mines authorities entered with pleasure.

There was much work connected with getting the new structure ready for the games. Though no provision as yet has been made by the State for equipping the gymnasium, President Craven worked out a plan to secure the necessary bleachers to accommodate the large crowds expected. These bleachers, the very latest of the knockdown type, were ordered from the Leavitt Manufacturing Company of Urbana, Illinois, late in January. With the co-operation of the Northern Pacific Railway officials in Butte they were rushed through to arrive on the Monday preceding the tournament. Then Superintendent - of - Grounds Haley and his force got busy, and by hard work fitted them into place in time for the opening games on Thursday afternoon. This work necessitated the tearing down of the temporary bleachers erected for the earlier Mines games and the fitting of these bleachers to the running track. To help the capacity of the running track some of the Butte high school bleachers

brought up for the Butte-Central game of February 14 were retained. The Leavitt knockdowns completely surround the playing floor with nine rows of seats on the sides and six rows on the ends. They have lowered footboards, thus allowing spectators the maximum of comfort in a bleacher seat. In addition, they are painted the same dark gray as the trim of the building. The total seating capacity of the lower floor runs about 1700 and places were provided for 500 more on the running track, making it possible to locate 2200 people with all but a hundred of them where they could see from an unobstructed viewpoint every inch of the playing floor.

Coach "Chuck" McAuliffe of the Ore Diggers had supervision over the games themselves and over the staff officials. He, together with Sanford Ladic, Mines 1923, and Kirk Badgley, former Montana U varsity forward, worked all of the games, very much to the satisfaction of the players and coaches. They were a fair and competent set of officials and kept things moving all the time. "Curley" Leary, former State College manager of athletics, acted as official scorer, and Prof. W. T. Scott of the Mines was official timekeeper for the sixth time at a Mining District Tournament.

The directing of the visiting players while they were on the campus and the policing of the gymnasium and the dressing quarters were in charge of Manager Norman Naughten of the Mines, who had the aid of a number of Ore Digger students. Considering the various difficulties under which they worked, these men handled things very well and sent the visitors away satisfied with the courtesy of their treatment. The scoreboards in the gymnasium were in charge of Charles McGreal, President of the A. S. S. M. They proved to be a big factor in keeping the crowds up on their toes during the strenuous battles that marked the play. Many of the spectators expressed wonder why the other gymnasiums in Butte had not adopted similar scoreboards long ago.

The schedule called for two games Thursday afternoon, three Thursday night, three each Friday morning, afternoon, and night, and two each Saturday afternoon and night. Classes were shortened Thursday afternoon and were dismissed on Friday so that

(Continued on Page Three)

BASKETBALL

MINES, 29—STATE NORMAL, 3

On February 12 the Mines hoopers copped a one-sided victory from the State Normay College by holding the teachers down to one field goal and one free throw while they amassed a total of 29 points.

Due to the condition of the floor, which was very slippery, the first half was rather slow and dull. Time after time players on both teams went sprawling on the floor and in this way numerous chances to score were lost. The half ended with the score at 6 to 1 for the Mines.

Between halves the floor was mopped and when the water had dried the players were able to secure a solid footing. During the last ten minutes of the game the Miners spurted and counted 20 points, bringing their total to 29, while the Dillonites were let down with 3 points. Downing was high scorer with 14 points to his credit and Egeberg was a close second with 10 points.

MINES, 12—BOBCATS, 20

On February 16 the Miners went down to defeat at the hands of the mighty Montana State College basketball team in one of the best-played and fastest games seen here this season. The score was 20 to 12.

The game started with a rush, and after five minutes of play the Ore Diggers took the lead when Sigler dropped the ball through the net from inside the foul line. For the remainder of the first half it was nip and tuck, with the lead see-sawing back and forth. The end of the half found the Miners on the long end of a 9-to-7 score.

A few minutes after the second half started Cottam tied the count, and then the Bobcats stepped to the front and remained there when Hartwig found his eye and connected with the basket several times to bring his team's total to 20 points, while the Miners could only add 3 points to their total. At the final gun the score was 20 to 12, giving the Aggies a hard-earned victory.

MINES, 20—K. OF C., 11

On February 9 the Mines took a fast game from the local K. of C. independent team by a score of 20 to 11.

The game was featured by the fast floor work of Egeberg and Thomson and the stellar defensive play of the entire Mines squad. The first half was fairly even with the Miners always in front. "Big Bill" Spears of the Caseys

(Continued on Page Three)

"M" CLUB SERVES REFRESHMENTS

During the recent Mining District Basketball Tournament, held in the Mines new gym under the auspices of Butte Central high school, the members of the School of Mines "M" Club were busily engaged providing the spectators with refreshments. The purpose of this commercial enterprise, which was under the supervision of Coach McAuliffe, was to secure money for the purchase of sweaters for the football and basketball squads, and from all reports the financial standing of the club has been greatly increased. The profits netted by the club during the tournament amounted to one hundred and five dollars. This will be a big help in the purchase of sweaters, but as the number of sweaters to be purchased is large it is probable that the club will give a sweater dance in order to make the money they still need.

ANDERSON-CARLISLE SOCIETY BANQUETS

The Anderson Carlyle Technical Society held its first social function of the year in the form of a banquet on the evening of February 4, 1925. The banquet was given at 7:00 in the banquet hall of the Thornton Hotel. Although the attendance was small, only eighteen members of the student body and faculty being present, the affair was a great success and proved to be of entertainment and interest.

The meeting was presided over by Pres. W. B. Tanner, who introduced Mr. C. D. Woodward, chief electrical engineer of the Anaconda Copper Mining Co., as the speaker of the evening. Mr. Woodward presented a very interesting talk on the activities of the Chile Copper Company in South America and the probable plans and undertakings of the Andes Copper Co.

Mr. Woodward included in his speech a description and explanation of the methods used in the mining and smelting of the ore. His descriptions of the surface diggings and metallurgical processes employed in the smelter were very good and interesting. The speaker laid particular emphasis upon the electrical plants that furnish power for the smelter and the mining operations. A description of the country traversed in a trip to the Chile Copper Company's properties and impressions of the land and the people added personal interest to the talk.

PASSING THE BUCK

The other day our promising young Joke Editor came rushing up to me and said, "Say, old man, I sure got a keen bunch of jokes for the next 'Acrobat'. Sit down a minute and let me jar you loose from a few guaranteed, hand-selected, spasm-producers, where I can watch the effect. I don't want to put anything in our monthly 'out-ery' that isn't fit for the front page of 'College Humor', so I thought I had better try them out on you.

"What do you think of this one? 'What is an eleven-letter word meaning "joint action" that doesn't mean anything to the School of Mines student body?'"

I looked at him a minute and finally told him it was too deep for me, and to go ahead and spring it. He did. The answer was, "Co-operation". I got up and said, "Dave, that isn't a joke; it's a tragedy. Beat it before Shakespeare hears about your stealing his stuff and has you shot."

After he left, I sat down and thought it over, and it seems to me that co-operation is one of the things we are sadly in need of. Instead of developing a spirit of co-operation, we have indulged in and over-developed the great American sport of "Passing the Buck". The student body must learn to co-operate with, and support, the men who represent them in athletics if the team is to be a success, and the same thing is true of our school paper.

If the Acropolis is to be a success its staff must have the co-operation and help of the student body. So let's all stop "Passing the Buck" and get together.

Kindly place your contributions in the Acropolis Mail Box, and the best material will be published under that heading every issue.

SENIOR NOTES

An important senior meeting was held during the last week for the purpose of discussing the annual senior trip, the selection of a class pin, and the possibility of holding a senior party. Committees were appointed to look into these matters.

It is about that time of the year when the senior begins to look around and wonder what company he will favor by becoming an employee of theirs upon graduation.

JUNIOR NOTES

One tournament is over only to see the coming of another. The next tournament will interest Mines men more than any one else, we suppose, as only those men are to take part in it.

In all probability five teams, maybe only four, will take part in the tournament. So far only two teams have entered; they are the "Chicken" squad and the junior team. Already feeling is running high over the game between these two teams, which will be the first game played of the tournament.

In fact, this game is talked about by the whole school. There seems to be some sort of wager up which will go to the winner at the expense of the loser. Now as to what this wager is, is only a matter of guess-work; but have you ever heard the Miners give this little yell at some hilarious moment?—"We are, we are, the engineers—!"

Of course, we don't want to do much guessing, but we bet the losers also have a good time after the game. What say?

On Wednesday, the 18th, the Junior Class held a meeting for the main purpose of electing a captain for their basketball team. "Brick" Martin was the "goat". Incidentally, plans for a junior party were discussed.

Godfrey Walker, a prominent member of the Junior Class, attended another "watermelon race" over the week-end.

SOPHOMORE NOTES

With one-half of the school year placed in the discard and the brightest part of the year advancing into the near future, the hopes and prospects of the sophomore class are bright and good. The members of the true sophomore class point with pride to the record achieved during the last semester, not one of the class failing in any subject.

The students who have just completed the course in topographical drawing ought to be able to work hard on their studies now, due to the removal of the worry and anxiety connected with the completion of their surveying calculations.

Why is it that some people show a sudden liking for dancing? The best

explanation usually includes a liking for some person of the opposite sex. According to reliable information the Winter Garden School is being patronized frequently of late by Mr. Don Mayo. Who is she, Don, and what would the folks at home say?

Ardent followers of the great noon-time, after-school, and cut lab. period sport of handball will be distressed and sorrowed to hear that Mr. Weyerstall is taking a correspondence course in theoretical and practical handball. It is also rumored that he has invested in the regulation equipment. Mr. Noel and other experts are advised to watch out for their laurels.

The most promising "shick" we have at present is Mr. Sawyer. We have been informed that Wesley has a new girl at every Mines dance.

After the great ability shown by Mayo, Quinn, Vlassof, Anderson, Wiegenstein, Thompson, and Sigler as hot-dog salesmen, waiters and confectionery venders, these men ought to have little difficulty in securing positions as hashers or confectionery dealers.

FRESHMAN NOTES

Some of the most interesting things have been discovered lately. For example, Mr. Spaulding is organizing material for a new book on trigonometry. He was caught in the English room last Friday working out some fundamentals. The work is never erased and the boards are on exhibition. A noteworthy feature is the absence of logarithms.

Mr. Anderson has a commendably honest way of saying just what he thinks. Other students mumble more privately. One was overheard to remark, "Who is that big guy that's so playfully rough with that Co-ed? If I were big enough I'd get mad at him". Take your feet down, Anderson.

Student (in Section One under Professor Hartzell): "Why do you make those eyes at me for?"

There is no God but Bachus, and James Spencer is his prophet. However, he lately took interest in Aphrodite for the sake of the DeMolay. Spencer claims also that there is no intrinsic value in a commodity and that he didn't pay the true market value for his corduroys.

Stanley Thurston divulged a very dear secret to a fellow-student the other day, but the affairs of his heart in Polson will not be mentioned.

CO-ED NOTES

The Co-Ed dance? Yes, it was the very first dance given in the new School of Mines gym, and it was the best dance.

When you entered the main floor of the gym a huge illuminated heart

first caught your eye. It was red, of course, and had a large silhouette of a girl's head, symbolic of the Co-Eds, in the center. This was suspended in the middle of the gym over the orchestra.

Then there were hearts—hundreds of them; large ones draped all around the running track and small ones around the orchestra, which was situated in the middle of the floor, and was a blaze of bright red.

On each backboard back of the baskets was another silhouette similar to the one on the large heart. On the decorations there was printed "St. Valentine's Day" or "Co-Eds".

The silhouette appeared on both programs and invitations. On the programs it was accompanied by copper lettering and the name of each number played written under each dance.

And the music! It was wonderful—just made you want to dance all the time. Then, too, the orchestra so arranged the time so that not one dance was omitted.

There was punch, too, red and orange, and to judge from the popularity of the punch bowl, it must have been delicious.

A good crowd was there, and if you want to draw your conclusions from their faces, would surely admit that the dance was a complete success, because every one was having a good time.

Of course, you want to know the committees that made this dance such a success. Here they are:

General and Entertainment: Effie Eminger, chairman; Catherine Arthur, Lucia Evans, Florence Gordon, and Mrs. G. W. Craven.

Refreshment: Mrs. W. T. Scott, chairman; Mrs. Roach, and Ruth Blomgren.

Music: Andree McDonald, chairman; Mrs. Blackburn, Alice Angove, and Mrs. Steve Hogan.

Decorations: Mrs. A. E. Adams, chairman; Delores Chidester, Ethelyn Culbertson, Miss Russell, Mrs. Wilson, and Claudia Woodward.

Invitations: Jane Freund, chairman; Catherine Leary, and Margaret MacLanahan.

Spring fever has claimed many students. A few have left, leaving us the proverb: "Experience is a great teacher if you don't spend too much time learning one lesson."

CO-ED AND DANCING CLUBS TO ENTERTAIN

Due to the great success of the Co-Ed dance that was held recently in the Mines new gym, the School of Mines Dancing Club and the Co-Ed Club are busily engaged in making plans for one of the biggest dances of the year. The two organizations are planning to combine forces and stage the social event of the season in the Mines new gym shortly after Easter. So far this year there have not been very many Mines dances, but with the completion of the new gym we can look forward to Mines dances at regular intervals.

THE MINING DISTRICT

(Continued from Page One)

The Mines students and faculty might enjoy the contests. In spare hours visitors were shown through the buildings.

The competing teams came from Anaconda, Butte high, Butte Central high, Boulder, Dillon, Helena, Deer Lodge, Missoula, Mount St. Charles academy, Philipsburg, and Lima. The latter team was coached by Elmer Caldwell, a Mines graduate, and for its first appearance at a tournament, and considering the small number of its student body, made a good showing. The Acropolis does not have the space to mention all of the games played. Most of them were won and lost by very close scores, indicating the class of teams engaged. There were no lopsided totals, such as featured the tournament games of a few years back. The final battle for first and second places was between Helena and Central and was won by Helena, which seemed to have a definite edge on the other quintets. The afternoon games on Saturday were between Butte and Missoula and Dillon and Mount St. Charles, with the winners competing that night for third and fourth places with the right to accompany Helena and Central to the State tournament. After desperate

contests, Butte and Dillon won. In the night game between these two Butte was not seriously threatened by the tired Dillon aggregation. Anaconda, Deer Lodge, and Boulder, other strong teams, fell down somewhat in their form and were eliminated after close games. Crowds running from 1400 on Thursday night to nearly 2000 on Saturday witnessed the evening contests. The morning and afternoon crowds were smaller, but were fully as enthusiastic in their cheering and enjoyment of the events.

The Extemporaneous Speaking Contest, held in connection with the tournament, was not under the direction of the Mines, but Prof. W. T. Scott acted as one of the three judges. It was won by Frank Lyden of Central, with James Barnes of Helena second.

At the meeting of the Mining District coaches held on Saturday morning it was voted to hold the tournament in Butte in 1926 under the auspices of Butte high school. This means that next year the Mines gymnasium will again be the center of attraction for a few days for the high schools of this section. Those of the Mines faculty and students who helped Central this time hope they can handle the 1926 event even more smoothly with their 1925 experience to help them.

BASKETBALL

(Continued from Page One)

showed some real class when he dribbled through the Mines squad to drop the ball into the net.

The second half was rather rough, and numerous fouls were called, but this did not slow up the game and the Miners continued to score. The final whistle found them on the long end of a 20 to 11 count.

MINES, 13—ST. CHARLES, 17

Playing their first game at home and also inaugurating the new gym, the Ore Digger basketball team dropped a hard-fought contest to the Mount St. Charles quint to the tune of 13 to 17.

From the initial whistle the game was fast and furious, with the Saints leading the Miners by 2 points during the greatest part of the game. With only two minutes to go the game stood 12 to 10 favoring the Saints. Then Sigler broke loose and tossed one in to tie it up at 12-all, where the score stood at the final gun.

Opening the extra period, Wiegstein missed a gift shot but was closely followed by Matlock, who sent the Miners into a 1-point lead by converting a chance from the foul line. This advantage was soon lost when Brown of the Saints tossed one in from the side lines and followed with another from the center of the floor. At the end of the period the score stood 17 to 13 for the Saints.

Brick Martin: "Say Feet, what is the difference between an airship and a whale?"

Walter: "I don't know."

Brick Martin: "Gee, but you're dumb."

There's one thing about a chemist—no matter what you say to him he always has a retort.

"Is he a foreman, really?"

"Yes. He has a hundred men under him."

"H'm! Must work on the top floor."

ALUMNI PAGE

This Alumni Page cannot be continued without the support of the alumni. Our notice in the last issue that alumni subscriptions were due and payable brought only a scattering response. You cannot expect the undergraduates to bear all the burden.

Please send H. H. Nightingale, Business Manager, \$1.25 to pay your subscription for 1924-25. "Do it now!"

Bob Nesbitt, one of our prominent authorities on the ways of women, says that most of the girls who used to be as pure as the snow have taken the air and drifted.

PILGER HONORED BY HOOVER

In Letter to President Craven Former Student Pays Tribute to Training Received at School of Mines Which Fitted Him for Advancement in Life

Theodore Pilger, formerly of Butte, Montana State School of Mines '12, has been appointed foreign trade commissioner by Secretary of Commerce Hoover. Sailing for Europe by way of England and France he is now making his headquarters in Berlin.

In his letter to President George W.

Craven of the School of Mines, Mr. Pilger pays tribute to the training he received at the Butte institution, which he says fitted him for the position that he has secured following a civil service examination covering civil engineering, business administration, and economics.

The appointment is equal to that of a trade ambassador in the field. He will study the iron and steel industry, electrical development, general industrial machinery, minerals and metals. In the field which has been assigned to him are 15 European countries. That he is pleased with the appointment is indicated in the letter received by President Craven.

Popular as Student.

Mr. Pilger graduated from the School of Mines in the Class of 1912. He was regarded as the most popular member of a large class composed of well known and popular young men. After his graduation, he became a member of the Butte firm of Roach & Pilger, real estate and mines, which remained in business from 1913 to 1917. In the latter year, he went with the Butte & Superior as mining engineer and a year later moved to Seattle, where he engaged in general practice of his profession.

In 1919 Mr. Pilger went with the Allis-Chalmers, manufacturers of all kinds of machinery, including mining equipment, was first stationed at the plant at West Allis, Wis., and then transferred to New York as a foreign sales agent. Making a record for sales, he attracted the attention of Secretary Hoover, who gave him the present appointment.

Credit to President Craven.

Mr. Pilger's most important task is helping re-establish trade relations in many lines with Germany and Central Europe, based on recent credits given Germany by the allies. Then comes a study of other European countries with the idea of developing mutual business activities.

His appointment is a special tribute to the thoroughness of President Craven's courses in mechanics and machinery and to Mr. Pilger's own drive and initiative. He is one of the strongest Montana Mines boosters and uses the slogan, "Get Montana State School of Mines recognized for what it is—the greatest mining school in the world."
